

## WM LIGHT

The WM LIGHT, made of aluminium, is extremely lightweight due to its spring-assisted system. Equipped with a quick connect and release system, the WM Light is easy to transfer from one vehicle to another once the simple location plates are installed. The ramp can be opened directly onto the ground without the use of feet and is available with an anti-slip aluminium surface or with mesh version.

## WM LIGHT VERSIONS

### STANDARD:

WM Light detachable and free standing. A procedure that can be performed within a couple of minutes.

### OPTIONAL:

WM Light with external rotation kit.

www.wmsystem.com

## VERSIONS OF FLAP

The ramp is equipped with a flap on the bottom, that comes with a round edge as standard for dock loading. There are also two straight flap options to allow a smoother lip for smaller wheels on to the ground. These need to be specified on the order.

### ROUND AND FLEXIBLE FLAP

STANDARD

### STRAIGHT AND FIXED FLAP

OPTIONAL 7AL100

### STRAIGHT AND FLEXIBLE FLAP

OPTIONAL 7AL101

## VERSIONS OF PLATFORM

A - Anti-slip aluminium

The material of the floor is anti-slip anodised aluminium, standard on the WM LIGHT. The maximum load capacity is 400 kg.

R - Aluminium expanded mesh

As an alternative you can have an aluminium expanded mesh surface, in the WM LIGHT-R version. The maximum load capacity is 300 kg and the widths available are 80 and 100 cm.

## EXTENSION KIT

The extension kit is fitted directly on to the ramp, allowing the length of loading ramp to be extended, decreasing the slope.
